Letter from the Catholic Education Office

We hope this letter finds all of you healthy, and happy. After just completing, arguably, the most difficult and challenging period in the history of our Diocesan Catholic school system, you all deserve a respite from the stress and worry that Covid-19 brought on all of us.

Although there is still much uncertainty about how the pandemic might affect education in the coming months, we want to assure you that the Diocesan Catholic Education Office has developed this plan to re-open our schools for the 2020-21 school year. We have studied guidelines provided by the CDC (Centers for Disease Control and Prevention), the IDPH (Illinois Department of Public Health), the ISBE (Illinois State Board of Education) as well several county health departments to formulate a plan that will allow our elementary and high schools to re-open on time. We obviously cannot see into the future and predict what the Covid-19 situation may look like in late August. Still, we are confident that by taking necessary health precautions, our Catholic schools will once again be open and be able to provide the same high-quality education it has for over 100 years.

We hope you find this document helpful and know that the Catholic Education Office will continuously communicate with our school administrators as these guidelines are adjusted by local and national health officials. We will make sure you, as stakeholders, will have access to updated plans either on-line or in hard copy.

All of us at the Catholic Education Office are committed to ensuring that our students receive the best Catholic education possible in as safe and secure an environment as possible. We look forward to the return to on-site education. The school environment may look somewhat different, but the quality and commitment will not change.

Let us continue to pray over the coming weeks and months for an end to the pandemic and a return to our school buildings for our students, teachers, and administrators.

God Bless and Stay Safe,

Michael Kagan
Superintendent of Catholic Schools
Diocese of Rockford

Vito C. DeFrisco
Assistant Superintendent of Catholic Schools
Diocese of Rockford

Reopening School Plan Timeline

The COVID-19 pandemic is being carefully monitored throughout the Diocese of Rockford. The decision to reopen schools will be made by the Bishop.

The safety and mental, social, emotional, and physical health of all in our school communities is paramount. The strategies and tactics included in each of our school's reopening plans will contribute to and align with the parish, state, and national efforts to minimize the spread of COVID-19 virus.

These Diocesan guidelines provide each school with direction and guidance for actions to be taken in the following three areas:

1. Health and Safety
2. Physical Infrastructure
3. Cafeteria/Gymnasium/Auditorium/Common Areas

The superintendent of each school, with direction from the Catholic Education Office and in collaboration with the school's Reopening Team, will adopt these guidelines and develop a plan specifically for his or her school community and school physical plant. Plans should be developed at each school and available by mid-July.

School Reopening Plan Development Timeline

July - the Superintendent will:

- ✓ Identify a school Reopening Team consisting of the superintendent, principal, school faculty members, school support staff members, and local healthcare professionals.
- ✓ Convene a meeting in July with the school's Reopening Team.
- ✓ Provide professional development for the Reopening Team relative to what is being expected of them and reviewing Diocesan and local health guidelines.
- ✓ Review the Diocesan reopening guidelines to adapt them for their specific school building needs.
- ✓ The Reopening Team finalizes and implements the school reopening plan.

August - the Superintendent will:

- ✓ Convene a meeting by late July with the Reopening Team to review/edit the plan
- ✓ Review and provide professional development for all school staff members about the plan and the strategies outlined in the Diocesan guideline and the School Reopening Plan.

Communications

- ✓ Clear rational, decision-making, and communication with all stakeholders are extremely important.
- ✓ The decisions that were made as a result of this plan were made by each school in consultation with the Diocesan Catholic Education Office and followed the ISBE, IDPH, and CDC guidelines.
- ✓ Communicate as needed with the diocese, state, and local education agencies, and local public health department.

Schools are expected to:

- Establish and maintain a strong relationship with the Council of Administration/Board of Consultors, diocese, state, and local education agencies, and local public health departments to communicate clear and thorough messages.
- Communicate appropriate messages to students, teachers, staff, and families so they feel the school is as safe as possible, including but not limited to:
 - Who is making decisions and what the decisions are
 - School-based mitigation efforts

Development of the plan – key considerations

HEALTH AND SAFETY

- ✓ School staff will consistently monitor the temperature of all who enter the building. All who enter the building are expected to wear masks.

SPACE/PHYSICAL/SOCIAL DISTANCE

- ✓ Physical distancing in corridors, bathrooms, stairways, and school office space will be directed and monitored by floor markings, signage, and student supervision by all school staff.

RETURNING TO SCHOOL

- ✓ All students will return on the first day of school, based upon the school's regular calendar and current Diocesan guidelines.

SCHEDULING

- ✓ Since students move in and out of classrooms, hallways, and common areas throughout the day, face masks must be worn and social distancing must be maintained.

School Reopening Guidelines

HEALTH AND SAFETY STRATEGIES

1. To ensure consistent temperature monitoring and hygiene standards:

- Diocesan schools will monitor the COVID-19 guidelines published by the ISBE (Illinois State Board of Education) and the IDPH (Illinois Department of Public Health).
- All employees will be trained in health and safety protocols relating to COVID-19.
- Per State and federal guidance, members of a school community who are sick should not return to school until they have met the criteria to return.
- Temperature monitoring devices are available and will be used each morning student, staff, and visitors enter the school building.
- Signage will be placed in main entranceways noting that persons may not enter the building if they have any currently known symptoms of COVID-19, such as:
 - Fever
 - Cough
 - Shortness of breath
 - Difficulty breathing
 - Chills
 - Fatigue
 - Muscle and body aches
 - Sore throat
 - New loss of taste or smell
 - Congestion or runny nose
 - Nausea
 - Vomiting
 - Diarrhea
 - Headache
- Social distancing will be maintained
- Face coverings will be worn at all times
- Additional substitute teachers will be available if needed.
- Schools are encouraged to hold parent programs such as back-to-school nights, and parent-teacher conferences virtually. Where not feasible or practical, they should be held individually, with the teacher meeting only with the student and the student's parent(s).

- When students are reported absent, school personnel should request specific information and ask about COVID-19 exposure and/or diagnoses.
- COVID-19 diagnoses and exposure cases should be reported to the local health department.
- The school will follow the ISBE, IDPH, CDC guidelines for students who were suspected of having COVID-19, whether they were tested or not, which state that 72 hours must elapse from the resolution of fever without fever-reducing medication and 10 days must pass after symptoms first appeared.
- Students diagnosed with or exposed to COVID-19 will be tracked. Tracking methods include checking in with the school nurse/principal/superintendent upon returning to school to verify the resolution of the symptoms and that any other criteria for the quarantine have been met.
- Students or staff returning to school following a quarantine period as a result of COVID-19 are required to check in with the school nurse or building administrator before they are admitted back into the school building.
- Any individual within the school environment who shows symptoms should be immediately separated from the rest of the school population, held in a designated quarantined area, and picked up as soon as possible.
- All quarantined areas will be cleaned and disinfected after each use per the health department guidelines.
- All individuals in the school building are required to wear face coverings unless they are younger than 2 years of age; having trouble breathing, or are unconscious, incapacitated, or otherwise unable to remove the cover without assistance.
- Schools should develop procedures to ensure 6-foot social distancing from other persons as much as possible.
- Individuals who have a temperature greater than 100.4 degrees Fahrenheit /28 degrees Celsius or currently known symptoms of COVID-19 (see above), may not enter the building.
- Frequently clean touched surfaces.
- Students should be given assigned seats and arranged in the same direction - if possible spaced 6 feet apart.
- Restrict sharing and borrowing any items.
- If students cannot eat lunch in their classrooms, student numbers in the cafeteria are required to follow gathering limits as outlined in Phase 4 of Restore Illinois which is 50 individuals.
- Music-related courses should be moved outside when possible with small class sizes. Face coverings should be worn while singing and social distancing maintained.

- Limit any nonessential visitors, nonessential volunteers, and activities involving external groups or organizations, as much as possible.
- Face coverings must be worn on the bus and no more than 50 individuals as outlined in Phase 4 should be on a bus at one time.
- All groups/organizations that use the school building are to submit a plan to the superintendent that addresses procedures for program implementation during the public health emergency.
- All school activities must follow the gathering limits of Phase 4 of the Restore Illinois Plan.
- At this time school field trips are to be discontinued until state and local health officials determine that it is safe to resume them.
- Disinfecting spray and wipes are available and will be used in all areas of the school building.
- Hand sanitizer is available in all classrooms and offices in the school building.
- Cleaning protocols have been established and are implemented throughout the school day with additional deep cleaning/sanitizing nightly.
- In the classroom student desks should be spaced as far apart as possible and facing one direction. If tables are used in the classrooms, students should be separated as much as possible. Student desks can also be separated with clear plexiglass barriers.
- Ventilation and airflow have been checked and where possible increased throughout the building.
- Protocols have been developed if a student/staff displays symptoms or tests positive during school.
- Procedures for consultation with local authorities for reporting positive tests.
- Should a student, staff member, or visitor exhibit signs of illness during the school day, the school will provide an N95 Mask for the individual who is showing signs of being sick and the staff members assisting them.
- All Diocesan high school athletic programs will adhere to guidelines and protocols established by the Illinois Department of Public Health, IHSA, Illinois State Board of Education, local county health departments, and the Catholic Education Office.

- Physical education will be taught outdoors if possible.
- If physical education is held indoors in the gym or other large common areas, students must adhere to social distancing and all activities must allow for 6-foot distances between students.
- Changing in locker rooms for physical education classes should be avoided and students are required to use hand sanitizer before and after physical education classes.
- Handshakes, high fives, or other physical contact is prohibited.

2. To ensure physical distancing in corridors, bathrooms, stairways, and school office space:

- Face masks are worn by everyone (students, teachers, office staff, and visitors) while in the school building.
- COVID-19 safety signage and guidelines are posted throughout the school.
- Hall/corridor traffic plans have been established and marked to maintain social distancing.
- Physical distancing will be directed and monitored by floor markings, signage, and student supervision by all school staff.
- All faculty/staff members have been trained in COVID-19 school safety guidelines.
- If possible traffic flow in and out of the restrooms will be monitored.
- Water fountains will only be used to fill water bottles. Drinking directly from the fountain is prohibited. Signs will be placed on drinking fountains, stating this.

PHYSICAL INFRASTRUCTURE STRATAGIES

1. Traffic patterns may be different, and entering and exiting the building may change.
 - Students, staff, and visitors are required to enter the school building from one entrance and exit through another.
 - Signs will be posted throughout the building directing the flow of foot traffic entering and leaving the school building.
 - Students are required to follow similar foot traffic patterns to minimize the spread of the virus.
 - Touch-points throughout the building during the day will be sanitized, this includes all restrooms after each use.
 - The building will be deep cleaned regularly before students arrive each morning.
 - If possible, Plexiglas will be installed in the school office as a protective barrier between visitors and staff members.

LUNCH/CAFETERIA

1. Changes will be made to how lunch is prepared and or served.
 - Students are required to use hand sanitizer before and after lunch.
 - If students will be eating in the cafeteria, no more than 50 students may eat at one time and social distancing must be maintained.
 - Cafeteria/lunch workers are required to wear appropriate PPE, including gloves and face masks while preparing and/or distributing lunches.
 - Social distancing is required during the lunch period.

Summary

Our goal is to provide the best possible academic program in a safe environment. We hope you find these guidelines helpful. We understand that you still may have many questions as we reopen the school. We know that these guidelines do not address everyone's concerns, but they have been developed for the safety of the staff, students, and the families we serve. Please be assured that we will continue to update these guidelines as necessary. We will also keep you abreast of any changes.

Each of our Diocesan schools is required to follow these guidelines and have them available for all stakeholders to review. Thank you for your continued support of Catholic education and we look forward to a positive, productive, and healthy school year.

If you have any questions, please contact your local high school superintendent.
